EU Projects: Specific Guidelines for hospital applicants.

Linked Third Party

For all clinics and hospitals connected to the University of Basel, Horizon 2020 projects are submitted with the "legal entity" UNIVERSITAT BASEL and the clinic as Linked Third Party.

In the administrative forms of the proposal, the project team at the clinic inserts the Participant Identification Code (PIC) of the UNIVERSITAT BASEL, 999907914). The PIC of the clinic is not required in the forms at the proposal stage, as the University Hospitals (USB, UPK, FPS, UKBB) participate in Horizon 2020 projects as so-called “Linked Third Parties” of the University of Basel:

- In the case of Marie Skłodowska-Curie Actions and ERC grant applications the University Hospitals simply apply under the University of Basel and contact our office: grants@unibas.ch.

- In all other cases this paragraph has to be included in Annex I under Chapter: Members of the consortium and links to third parties / Partner No X, University of Basel (UNIBAS) / Third parties involved in the project / University Hospital ... [USB/UPK/FPS/UKBB]:

“The University of Basel includes the University Hospital … as Linked Third Party (third party with a legal link). The affiliation is based on the fact that the University of Basel is in charge of all aspects regarding education and research carried out at the University Hospitals. The legal basis is given by the public laws establishing the University of Basel and the University Hospitals as well as the bilateral contracts (performance agreements, Leistungsvereinbarungen) between the University of Basel and its University Hospitals. The University Hospital … will carry out the work as described in Annex I. The University of Basel – mandating its University Hospitals regarding education and research - is in charge of all aspects concerning contract management, accounting, controlling, financial reporting, exploitation of intellectual property and audit management. The practice to delegate the financial project management to the Finance Department of the University of Basel is accepted by the Swiss National Science Foundation for the national projects. It is also part of the accounting rules of the University of Basel as shown in the notes of the yearly financial statements.”
