The workshop will take place at:
University of Basel
Kollegienhaus - Fakultätenzimmer 112
Petersplatz 1
CH-4001 Basel

Public transport:
The University of Basel is very easy to get to by public transportation. From the SBB and Badischer Bahnhof train stations it takes around ten minutes on bus 30 to reach the bus stop “Spalentor”.

Car:
When traveling from the A2/A3, follow signs to Basel-Süd/City, Ausfahrt Basel-Süd/West Universitatssspital, Universitätssspital and City-Parking. Because finding suitable parking is difficult, we recommend using public transport.

Plane:
Take the airport shuttle bus (number 50) from Basel EuroAirport to SBB train station and then change to bus 30 to stop “Spalentor”.

Symposium

Ethical Issues in Big Data Research

Big Data is increasingly used in science, the humanities and medicine and to generate novel evidence based findings across multiple disciplines. However, research using big data also raises important ethical questions. The aim of the symposium is to explore some of the most pressing ethical issues, including anonymization, protection of human subjects, fairness and data protection. To this end, researchers from multiple fields will discuss their own experiences of the promises and challenges of data-driven research involving human subjects, and share their insights on ethics in big data with the symposium attendees.

The symposium will be divided into two parts. In the morning there will be a talk by Dr. Mariarosa Taddeo from the Oxford Internet Institute who will critically introduce the ethical issues of Big Data, followed by four short presentations from Swiss researchers working with Big Data in the fields of Epidemiology, Psychology and Data Science. After lunch, there will be a closed round table discussion where researchers will have the possibility to further discuss the topics that emerged during the morning session.

The morning presentation session is open to the public and will take place in Fakultätenzimmer 112 of the Kollegienhaus. The round table in the afternoon is a closed session upon invitation and it will take place in Seminarraum 007 at the ground floor of the Institute for Biomedical Ethics in Bernouillistrasse 28.

Registration to the event is not mandatory but strongly recommended. Registration can be made at this link: http://events.eventzilla.net/e/ethical-issues-in-big-data-research-2138713030 or by sending an email to favarettomaddalena@unibas.ch.

The event is organized by the Institute for Biomedical Ethics in collaboration with the Swiss Society of Biomedical Ethics. Sponsorship to the event was provided by the Swiss National Science Foundation (NRP75 "Big Data" Project), the Swiss Academy of Humanities and Social Sciences and others to be announced.
