 April 22nd 2026
12.30 - 18.30 PM

 ETH D-BSSE, Room E27
Klingelbergstrasse 48, 4056 Basel

Join us on April 22 to explore how microbiome science can drive innovation at the intersection of food and health. The event brings together researchers, startups, and industry to connect scientific insights and translate them into market-ready applications that create a positive impact for people and the planet.

Together, we strengthen the microbiome community in Switzerland, encourage collaboration across sectors, and spark new ideas for innovation.

Interactive and engaging elements will create an open atmosphere that allows you to immerse yourself in the fascinating realm of the microbiome, where food and health converge.
