Wissenschaftsmonat Keynote Lecture

Friday 22 March 2019, 10:30–11:30
Zentrum für Lehre und Forschung (Hebelstr. 20, Basel), Grosser Hörsaal

Prof. em. Dr. Hannelore Daniel

Hannelore Daniel held the position of a Chair of Physiology of Human Nutrition at the Technical University of Munich (TUM), Germany. Her main research interests are control mechanisms in mammalian metabolism which she studies in model organisms and humans. She uses a diversity of cell and molecular techniques and metabolomics for more comprehensive and better phenotyping. Some of the research relates directly to new approaches for personalised nutrition. She received numerous scientific awards including the "Pro meritis-Award" and the Silver medal of the State of Bavaria.

Anyone interested is welcome to attend.

The Keynote Lecture is part of the final congress of the Wissenschaftsmonat (Science Month), where the best 5th year medical students give presentations and receive awards.
